

WOFE-07 Best Paper Award

Workshop On Frontiers in Electronics
WOFE 07 December 15 - 19, 2007
Park Royal Hotel
Cozumel, Mexico

The aim of the workshop is to bring together leading scientists and engineers who work at the frontiers of electronic devices and circuits, yet emerging from traditionally separated fields with different professional backgrounds. Rapid pace of electronic technology evolution compels a merger of such technical areas as low-power digital electronics, microwave power circuits, optoelectronics, etc., which collectively have become the foundation of today's electronic technology. The Workshop aims at encouraging active cross-fertilization of the different "species" in this electronic planet. The work will gather experts from academia, industry, and government agencies to review the recent exciting breakthroughs and their underlying physical mechanisms. The program committee invites discussions of controversial issues, provocative views, and visionary outlooks. Debates on the future trends and directions and the market pull as well as the necessary policy and infrastructure changes are encouraged. Attempts will be made by the convention to solicit alternative views and rebuttals.

Important deadlines:
October 7 Abstract due
November 1 Acceptance notification

PROCEEDINGS WILL BE PUBLISHED IN IJHSE AND AS A HARD COVER BOOK BY WORLD SCIENTIFIC
