ESE 568 COMPUTER AND ROBOT VISION
Stony Brook University, Electrical and Computer Engg., Fall 2022, 3 credits.

Instructor: Prof. Murali Subbarao

DRAFT VERSION 1.0. This is subject to some changes.

Pre-requisites: Basic background in Linear algebra, Calculus, Probability, and Programming. Projects can be completed using MATLAB/Python. If you have prior programming experience (as in ESE 224) but do not know MATLAB and Python, then you will need around 10 hours to learn enough MATLAB/Python for this course.

Instructor: Prof. Murali Subbarao   murali.subbarao@stonybrook.edu
Office Hours: Tue. 11.15 am to 1.15 pm
Thurs. 11.15 am to 1.15 pm

- Stanford University CS231n: Convolutional Neural Networks for Visual Recognition

Part I Image Formation Models, Geometric Transformations, and Image Processing

1. Introduction: Introduction, Overview, and applications.
2. Digital images for representing 2D, 3D, and moving objects. Human eye and digital camera models.
3. Linear algebra overview. (vectors, points, lines, planes, surfaces, matrices).
5. Geometric-information: Representation of points, lines, planes, surfaces, and shapes in 3D, nature and structure of medical images. Two-dimensional and three-dimensional geometric transformations of images and 3D scenes.
6. **Image filtering**: gray-level transformations, histograms, convolution, noise reduction, spatial and Fourier domain filtering and convolution, Gaussian filtering, and image resolution pyramids.

**Part II Image Features: detection and matching**

7. **Feature detection**: gradient vector, Canny's edge detection, Harris-corner detector.

**Mid-term test 1 : 25 % : 9/30/2022 ( 1 hr 30 mins, Open to 50 sheets or 100 pages of notes material)**

8. **Contours**: Model fitting, Total LSE, Least Median Square Error.
9. RANSAC, Hough transform.
10. SIFT vector, image stitching, ICP.

**Part III Machine Learning, Object Recognition, Neural Nets, and Artificial Intelligence**

2. **Machine learning**: clustering techniques, K-mean clustering, PCA.
4. Neural Nets, Convolution Neural Nets,
5. Deep learning, AI.

**Part III 3D Imaging, 3D Motion, Medical imaging.**

11. **Three-dimensional shape recovery**: 3D from Stereo Images; Stereo Camera model, calibration, matching, rectification.

**Mid-term test 2: 25% : 11/11/2022 ( 1 hr 30 mins, Open to 50 sheets or 100 pages of notes material)**

13. 3D Motion from Video, optical flow, other shape-from-x methods (texture, shading, focus/defocus, Optical flow, etc). Machine and robot vision applications and self-driving cars.
14. **Medical Imaging**: Modes of medical imaging, X-ray Computed Tomography, image reconstruction algorithms.

**Final Exam: Take-home problem set (10%)**

**Programming Projects (30%)**: There will be around 3 programming projects using MATLAB. Each project may take around 10 hours for completion.
Project 1: 2D and 3D Geometric transforms, imaging in a pin-hole camera.
Project 2: Image processing, Feature Detection, and Local Feature Descriptor
Project 3: Convolutional Neural Nets for Image Recognition

Seminar presentation (10%): Each student will have to present a paper published within the last 10 years on a topic of current interest. Length of presentation: 12 minutes.

**GRADING**

- Mid-term Test 1: 25% : 9/30/2022 (1 hr 30 mins, open to 50 sheets or 100 pages of notes)
- Mid-term Test 2: 25% : 11/11/2022 (1 hr 30 mins, open to 50 sheets or 100 pages of notes)
- Final exam : 10% (Take-home problem set)
- Projects: : 30%
- Presentation : 10% (12 minutes on a published paper)

**Grading Policy**
Grades are assigned based on absolute percentage of total marks as below.

A : 93—100 , A- : 88—92 ,
B+ : 83—87, B : 78—82, B- : 73--77
C+ : 70—72, C : 65—69, C- : 61—64,
D+ : 56—60, D : 51—55, F : 0—50

Student Accessibility Support Center Statement
If you have a physical, psychological, medical, or learning disability that may impact your course work, please contact the Student Accessibility Support Center, 128 ECC Building, (631) 632-6748, or via e-mail at: sasc@stonybrook.edu. They will determine with you what accommodations are necessary and appropriate. All information and documentation is confidential.

**Academic Integrity Statement**
Each student must pursue his or her academic goals honestly and be personally accountable for all submitted work. Representing another person's work as your own is always wrong. Faculty is required to report any suspected instances of academic dishonesty to the Academic Judiciary. Faculty in the Health Sciences Center (School of Health Technology & Management, Nursing, Social Welfare, Dental Medicine) and School of Medicine are required to follow their school-specific procedures. For more comprehensive information on academic integrity, including categories of academic dishonesty please refer to the academic judiciary website at [http://www.stonybrook.edu/commcms/academic_integrity/index.html](http://www.stonybrook.edu/commcms/academic_integrity/index.html)

**Critical Incident Management**
Stony Brook University expects students to respect the rights, privileges, and property of other people. Faculty are required to report to the Office of University Community Standards any disruptive behavior that interrupts their ability to teach, compromises the safety of the learning environment, or inhibits students' ability to learn. Faculty in the HSC Schools and the School of Medicine are required to follow their school-specific procedures. Further information about most
academic matters can be found in the Undergraduate Bulletin, the Undergraduate Class Schedule, and the Faculty-Employee Handbook.
